

Art Space

Whether you are creating art, or looking for a place to showcase your private collection, the Art Space has the versatility to function as a workspace or a gallery. Clearstory windows provide generous natural lighting and leave your critically important wall space un-interrupted. Flexible track lighting affords you a night-time lighting alternative. We also think this is a great space for everything from a quiet tasting room to a personal yoga studio. Starting at \$35,000.
